

Talking with Hard of Hearing People: Here's How to Do It Right

Communicating is important to all of us. When communication breaks down, we all suffer. For hard of hearing people, this happens all the time. This book is for you-whether you are hearing or hard of hearing! It explains how to communicate with hard of hearing people in one-to-one situations, in groups and meetings, in emergency situations, and in hospitals and nursing homes. When you use the principles given in this book, you will be able to have a comfortable chat with a hard of hearing person.

Author: Neil G. Bauman
