

Unheard Voices: A Dramatic Look Into the Heart of Hearing Loss

Unheard Voices is a candid and compassionate portrayal of people coping with the life-changing impact of hearing loss. Gael Hannan, an actress with a profound hearing loss, portrays all the characters in this performance that covers the human spectrum of hearing loss—children, adults, women, men and professionals. It covers issues and adaptations connected with hearing aids and cochlear implants. The stories are both funny and moving, as ordinary words describe how hearing loss makes one feel and behave.
