

Classifiers

This DVD will teach you how to identify the different types of classifiers and how to use them appropriately. It will introduce you to terms like “perimeter morpheme,” “movement roots,” and “classifier predicates” to give you tools to discuss your work. This DVD details classifiers in a scaffold approach that allows you to learn about this imperfect linguistic aspect of ASL in a manner that is fun, thought provoking and allows for creativity. There are 200 additional minutes worth of practice content. CUEs can be earned.
